

There are several ways you can send us your digital images.

E-mail. to [images@arrowcamera.com](mailto:images@arrowcamera.com)

Your server may be limited only to one or two files depending on the restrictions of your server.

### Software:

Pick up free software in our store. You can install the software on your computer for a direct link to our lab. It gives you choices of sizes and prices. You can also go to our web site for a free download. You are limited to JPG files only. To download the free software go to [www.arrowcamera.com](http://www.arrowcamera.com) click on-line photo processing .

We also offer an HTML upload page, for our clients that prefer not to install software on their computer.

### FTP Folder upload:

Allows you to send images to us without having to worry about "timing out" during a long upload. We prefer you put your images in a folder with instructions, telephone number included. You may use our generic public folder or we can set up a private folder for you. You are linking directly to our web site. You are not limited to file type size or quantity. You must have at least a DSL connection and don't forget to include instruction To upload to our public FTP folder using windows or internet explorer. To find out which version of internet explorer you have, in the toolbar go to help, About internet explorer.

### For IBM users: using Internet explorer 6

To upload to our public folder

1. Open up your Internet explorer
2. Type ftp://arrowcamera.com
3. push enter.
4. Wait for password window to come up, type the user name:

upload2007 password: Quality2007

(make sure to use capital Q)

Move folder to the side so you can see the desktop. Simply copy and paste or drag your images into the generic Digital Folder or you can create your own folder with your name.

### IBM users: using Internet explorer 7

Client Windows XP comes with a network manager that you can use as an FTP client.

Creating a Windows XP Network Place

Once you create a network place for your Web site, you can access your Web site folders in the same way you access any of your folders in Windows.

### To Create a Network Place

1. In Windows XP, select Start > My Network Places.
2. Under the "Network Tasks" sidebar, select "Add a network place." The "Add a Network Place Wizard" displays.
3. Click "Next."
4. Select "Choose another network location" and click "Next."
5. Enter the Internet address for our FTP site. For example, ftp://arrowcamera.com
6. Click "Next."
7. Make sure that the "Log anonymously" option is not selected. Enter your FTP user name. upload2007 Click "Next."
8. Click "Next." Click "Finish"

After you click "Finish," your network place opens

in a new window, and the "Log on as" window displays. Enter your FTP password Quality2007 and click "Log On."

You can open your network place at anytime by selecting Start > My Network Places and clicking on the arrowcamera name.( folder)

Transferring Files to our Web Site

To transfer your files on your computer to our Web site, simply copy the files you want to upload and paste them into your network place directory. You can move files back in forth in the same way that you move files around in Windows Explorer.

### For Macintosh user:

Step one: Go to <http://fetchsoftworks.com> web site to download a FTP Program. There are a lot of free FTP programs available.

After download and install these are the settings.

1. Site name ftp://arrowcamera.com
2. User name: upload2007
3. Password: Quality2007
4. (make sure to use capital Q)

Don't forget to e-mail or call us.
